

32-17308: Recombinant human HBL protein with C-terminal human Fc tag**Alternative Name :** GAL1, GBP**Description**

Expression Host : HEK293

The protein has a predicted molecular mass of 50.27 kDa after removal of the signal peptide.

The galectins are a family of beta-galactoside-binding proteins implicated in modulating cell-cell and cell-matrix interactions.

This gene product may act as an autocrine negative growth factor that regulates cell proliferation.

Product Info

Amount :	50 µg
Purification :	The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue staining.
Content :	Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8 % trehalose is added as protectants before lyophilization.
Storage condition :	Store at -80°C for 12 months (Avoid repeated freezing and thawing)
