30-2508: Anti-MEK1/2 Antibody

Clonality: Polyclonal
Application: WB
Reactivity: Human
Gene: MAP2K1
Gene ID: 5604
Format: Purified

Alternative Name: MAPKK 1/2, MKK1/2

Isotype: Rabbit IgG

Synthetic peptide (coupled with KLH) derived from aminoacid sequence 33-53 of human MAPK

Immunogen Information: Kinase 1. The immunogen sequence is highly conserved within species (human, mouse, rat,

hamster, bovine etc.).

Description

MEK (MAPKK, kinase of mitogen-activated protein kinase) is the medium one of three components of MAP kinase cascade – an important signaling pathway that regulates cell growth and differentiation. Raf (MAPKKK) activates MEK 1 and 2 via phosphorylation of two serine residues (Ser218 and Ser222). Activated MEK 1/2 then acts as a dual Specificity kinase phosphorylating both a threonine and a tyrosine residue on ERK (MAPK, mitogen-activated protein kinase). This phosphorylation of ERK by MEK 1/2 is a critical step in the MAP kinase cascade. Phosphorylated ERK is capable of translocating to the nucleus, where it regulates gene expression by activating transcription factors.

Specificity: The polyclonal antibody reacts with intracellular antigens MEK 1/2. MEK 1 and MEK 2 are integral components of the MAP kinase cascade, an important pathway for cell growth and differentiation.

Product Info

Amount: 0.05 mg

Purification: Purified from rabbit serum by affinity chromatography

Content:

Formulation: Stabilizing phosphate buffered saline (PBS) solution containing 15 mM sodium azide

Storage condition : Store at 2-8°C. Do not freeze.
