

30-2512: Anti-Human LAR Antibody (Clone : W7C6)

Clonality :	Monoclonal
Clone Name :	W7C6
Application :	FACS
Reactivity :	Human
Gene :	PTPRF
Gene ID :	5792
Format :	Purified
Alternative Name :	Leucocyte common antigen related molecule, PTPRF, W7C6, protein tyrosine phosphatase receptor type F
Isotype :	Mouse IgG1
Immunogen Information :	WERI-RB-1 retinoblastoma cells

Description

LAR is a receptore-linked transmembrane protein tyrosine phosphatase expressed on mesenchymal stem cells, that reside e.g. in bone marrow, blood, placenta, adipose tissue, or skin, as well as it is expressed on some carcinoma cell lines, including HeLa, MCF-7, or HT29. During the process of externalization, LAR is intracellularly proteolytically processed into two non-covalently associated subunits. This protein is involved in intercellular and cell-matrix interactions and its extracellular part resembles that of cell adhesion molecules (CAMs). The extracellular part can be released from the surface, which may be used for regulation of LAR function.

Specificity : The mouse monoclonal antibody W7C6 recognizes an extracellular epitope of protein tyrosine phosphatase LAR, a marker of mesenchymal stem cells.

Product Info

Amount :	0.1 mg
Purification :	Purified by protein-A affinity chromatography
Content :	1 mg/ml Formulation : Phosphate buffered saline (PBS) solution with 15 mM sodium azide
Storage condition :	Store at 2-8°C. Do not freeze.
