

30-2542: Anti-Rat CD8b Low Endotoxin Antibody (Clone : 341)

Clonality :	Monoclonal
Clone Name :	341
Application :	FACS , WB, Functional Assay, IP, IHC(F)
Reactivity :	Rat
Gene :	CD8b
Gene ID :	926
Format :	Low Endotoxin
Alternative Name :	Ly-3, Ly-C, Lyt-3,CD8b molecule
Isotype :	Mouse IgG1 kappa
Immunogen Information :	CD8 positive Wistar rat splenic T cell hybridomas

Description

The CD8b (CD8 beta) subunit of CD8 T cell coreceptor is expressed in CD8 alpha/beta heterodimers on majority of MHC I-restricted conventional T cells and thymocytes and in CD8 alpha/alpha homodimers on subsets of memory T cells, intraepithelial lymphocytes, NK cells, macrophages, mast cells, and dendritic cells. Regulation of CD8 beta level on T cell surface seems to be an important mechanism to control their effector function. Assembly of CD8 alpha/beta but not alpha/alpha dimers is connected with formation or localization to the lipid rafts. Recruiting triggered TCR complexes to these membrane microdomains as well as affinity of TCR to MHC I is modulated by CD8, thereby affecting the functional diversity of the TCR signaling.

Specificity : The mouse monoclonal antibody 341 (also known as 34.1) recognizes rat CD8b, the 32-34 kDa beta chain of the CD8 coreceptor (extracellular epitope), expressed on T cell subsets and some other cell types, such as macrophages.

Product Info

Amount :	0.1 mg
Purification :	Purified by protein-A affinity chromatography
	1 mg/ml
Content :	Formulation : Low endotoxin azide free phosphate buffered saline (PBS) solution, 0.2 µm filter sterilized. Endotoxin level is less than 0.01 EU/µg of the protein, as determined by the LAL test.
Storage condition :	Store at 2-8°C. Do not freeze.
