

30-2575: Anti-Human CD352 Antibody (Clone : hsF6.4.20)

| | |
|--------------------------------|---|
| Clonality : | Monoclonal |
| Clone Name : | hsF6.4.20 |
| Application : | ICC, IP, FACS |
| Reactivity : | Human |
| Gene : | SLAMF6 |
| Gene ID : | 114836 |
| Format : | Purified |
| Alternative Name : | SLAMF6, KALI, NTBA, Ly108, SF2000, SLAM family member 6 |
| Isotype : | Mouse IgG1 |
| Immunogen Information : | CD352 transfectants |

Description

CD352, also known as SLAMF6 (SLAM family member 6) is a type I transmembrane glycoprotein expressed on NK cells, T cells, and B cells, and serves as a coreceptor for them. Besides association of its tyrosine phosphorylated intracellular domain with SH2D1A protein, it associates also with SH2 domain-containing phosphatases, which can modulate the signaling. Multiple CD352 isoforms have been identified.

Specificity : The mouse monoclonal antibody hsF6.4.20 recognizes an extracellular epitope of CD352, a transmembrane glycoprotein expressed on NK, T and B cells.

Product Info

| | |
|----------------------------|---|
| Amount : | 0.1 mg |
| Purification : | Purified by protein-A affinity chromatography |
| Content : | 1 mg/ml Formulation : Phosphate buffered saline (PBS) solution with 15 mM sodium azide |
| Storage condition : | Store at 2-8°C. Do not freeze. |
