## 30-2591: Anti-Human CD300a APC (Clone: MEM-260)

Clonality: Monoclonal
Clone Name: MEM-260
Application: FACS
Reactivity: Human
Conjugate: APC
Gene: CD300A
Gene ID: 11314

Alternative Name: IRC, CLM-8, IGSF12, CMRF35H,CD300a molecule

**Isotype:** Mouse IgG1

Immunogen Information: HPB human acute lymphoid leukemia cell line

## **Description**

CD300a (CMRF-35H, IRp60) is a non-MHC-specific inhibitory receptor of immunoglobulin superfamily, which contains three immunoreceptor tyrosine-based inhibitory motifs (ITIMs) that associate with SH2-containing phosphatases SHP-1 and SHP-2. CD300a is expressed on many cell types including T cells, NK cells, neutrophils, eosinophils or mast cells. Its triggering inhibits activating signals such as those of IL5, GM-CSF or eotaxin, as well as supresses mast cell degranulation or NK cell cytotoxic activity.

Specificity: The antibody MEM-260 reacts with an extracellular epitope of CD300a, a 60 kDa leukocyte transmembrane glycoprotein expressed on human granulocytes, monocytes, neutrophils, NK cells, mast cells and dendritic cells, 25% of circulating T cells and 15% of circulating B cells.

## **Product Info**

Amount: 100 tests

Purification:

The purified antibody is conjugated with allophycocyanin (APC) under optimum conditions. The

conjugate is purified by size-exclusion chromatography.

Content: Formulation: Stabilizing phosphate buffered saline (PBS) solution containing 15 mM sodium azide

Storage condition: Store in the dark at 2-8°C. Do not freeze. Avoid prolonged exposure to light.

## **Application Note**

Flow cytometry: The reagent is designed for analysis of human blood cells using 10  $\hat{A}\mu$ l reagent / 100  $\hat{A}\mu$ l of whole blood or 10<sup>6</sup> cells in a suspension. The content of a vial (1 ml) is sufficient for 100 tests.
