30-2681: Mouse IgG3 Isotype Control DyLight® 488 (Clone : PPV-07) (Discontinued)

Clonality : Monoclonal
Clone Name : PPV-07
Isotype : Mouse IgG3

Description

Specificity : This mouse IgG3 monoclonal antibody (clone PPV-07) reacts with undefined epitope on a plant pathogen.

Product Info

Amount :	0.1 mg
Purification :	The purified antibody is conjugated with tandem dye DyLightÂ® 488 under optimum conditions. The conjugate is purified by size-exclusion chromatography.
Content :	0.1 mg/ml Formulation : Stabilizing phosphate buffered saline (PBS) solution containing 15 mM sodium azide
Storage condition :	Store in the dark at 2-8°C. Do not freeze. Avoid prolonged exposure to light.

Application Note

Negative control: The reagent is intended as an isotype control to establish the amount of non-specific antibody binding. For your particular experiment, use the same concentration of this control antibody as the recommended working concentration of the antigen-specific antibody. Also, when working with prediluted antibodies, dilute the isotype control to the same concentration as is the concentration of the antigen-specific antibody in the prediluted antibody solution you are using. If under particular experimental conditions the background signal of the isotype control is too high (usually when working concentrations of used antibodies are above 10 Âµg/ml of incubation mixture), change the conditions of your experiment to reduce the background.

For Research Use Only. Not for use in diagnostic/therapeutics procedures.
