

21-6001: SARS CoV2 Spike S1 C-Term His Tag Protein

Description

Source: **Covid 19 Spike S1-His in CHO-K1**.The spike protein (S1) of coronavirus (CoV2) attaches the virus to its cellular receptor, angiotensin-converting enzyme 2 (ACE2). A defined receptor-binding domain (RBD) on S mediates this interaction.The S protein plays key parts in the induction of neutralizing-antibody and T-cell responses, as well as protective immunity.
