## 12-8050: Anti-Human CD52 (Alemtuzumab) - HRP

Clonality: Monoclonal **Clone Name:** Campath-1H

Application: **ELISA** 

**Alternative Name:** HE5; CDW52; EDDM5 CDW52; Cambridge pathology 1 antigen

Isotype: Human IgG1k

Immunogen Information: Human lymphocytes.

## **Description**

Expression Host: HEK-293

This non-therapeutic biosimilar antibody uses the same variable region sequence as the therapeutic antibody Alemtuzumab. Clone Campath-1H recognizes human CD52. This product is for research use only.

Clone Campath-1H is a monoclonal antibody that specifically binds to CD52, a protein present on the surface of mature lymphocytes. However, this protein is not present on the stem cells that generated these lymphocytes. Alemtuzumab is targets and destroys mature lymphocytes containing CD-52, and is used to treat chronic lymphocytic leukemia (CLL) and multiple sclerosis. Anti-Human CD52 (Alemtuzumab) utilizes the same variable regions from the therapeutic antibody Alemtuzumab making it ideal for research projects.

## **Product Info**

Amount: 100 μg

Concentration: 0.5 mg/ml

This HRP-conjugated antibody is formulated in 0.01 M phosphate buffered saline (150 mM NaCl) Content:

PBS pH 7.2 - 7.4, 1% BSA. (Warning: Use of sodium azide as a preservative will inhibit the

enzyme activity of horseradish peroxidase)

This horseradish peroxidase conjugated monoclonal antibody is stable when stored at 2-8°C. Do Storage condition:

not freeze.

## **Application Note**

The suggested concentration for Alemtuzumab biosimilar antibody for staining cells in flow cytometry is <= 1.0 µg per 106 cells in a volume of 100 µl. Titration of the reagent is recommended for optimal performance for each application.
