

## 12-9216: Anti-CD36 antibody(DMC273), IgG1 Chimeric mAb

**Clonality :** Monoclonal  
**Clone Name :** DMC273  
**Application :** FACS  
**Reactivity :** Human  
**Alternative Name :** BDPLT10, CHDS7, FAT, GP3B, GP4, GPIV, PASIV, SCARB3

### Description

The protein encoded by this gene is the fourth major glycoprotein of the platelet surface and serves as a receptor for thrombospondin in platelets and various cell lines. Since thrombospondins are widely distributed proteins involved in a variety of adhesive processes, this protein may have important functions as a cell adhesion molecule. It binds to collagen, thrombospondin, anionic phospholipids and oxidized LDL. It directly mediates cytoadherence of *Plasmodium falciparum* parasitized erythrocytes and it binds long chain fatty acids and may function in the transport and/or as a regulator of fatty acid transport. Mutations in this gene cause platelet glycoprotein deficiency. Multiple alternatively spliced transcript variants have been found for this gene.

### Product Info

**Amount :** 100 µg  
**Purification :** Purified from cell culture supernatant by affinity chromatography  
**Content :** Not Sterile  
**Storage condition :** Store at -20°C for 12 months (Avoid repeated freezing and thawing)

### Application Note

FACS 1/100

Figure 1. Flow cytometry analysis with Anti-CD36 (DMC273) on Expi293 cells transfected with human CD36 (Blue histogram) or Expi293 transfected with irrelevant protein (Red histogram).
