12-9060-B: Biotinylated Anti-mesothelin antibody(DM73), Rabbit mAb

Clonality: Monoclonal
Clone Name: DM73
Application: ELISA, FACS
Reactivity: Human
Format: Liquid

Alternative Name: Mesothelin, MPF,

Description

This gene encodes a preproprotein that is proteolytically processed to generate two protein products, megakaryocyte potentiating factor and mesothelin. Megakaryocyte potentiating factor functions as a cytokine that can stimulate colony formation of bone marrow megakaryocytes. Mesothelin is a glycosylphosphatidylinositol-anchored cell-surface protein that may function as a cell adhesion protein. This protein is overexpressed in epithelial mesotheliomas, ovarian cancers and in specific squamous cell carcinomas. Alternative splicing results in multiple transcript variants, at least one of which encodes an isoform that is proteolytically processed.

Product Info

Amount : 100 μg

Purification: Purified from cell culture supernatant by affinity chromatography

Content: Not Sterile

Storage condition: Store at 2 °C-8 °C for 6 months

Application Note
