

## 32-13733: C5 Human

**Format :** C5 protein solution contains 10mM sodium phosphate, 145mM NaCl, pH 7.2.

**Alternative Name :** Complement Component 5, C3 and PZP-Like Alpha-2-Macroglobulin Domain-Containing Protein 4, C5a Anaphylatoxin, Prepro-C5, CPAMD4, Anaphylatoxin C5a Analog, ECLZB, C5A, C5D, C5b, C5.

### Description

Source: Human Plasma.

Physical Appearance: Sterile filtered solution.

Biological Activity: null

Complement C5 is cleaved into C5a and C5b and is activated by all 3 pathways of complement activation. Each pathway of complement activation generates proteolytic enzyme complexes which binds to the target surface. These enzymes cleave a peptide bond in the larger alpha chain of C5 releasing the highly potent anaphylatoxin C5a and activating C5b. C5a has an imperative role in chemotaxis and C5b forms the 1st part of the complement membrane attack complex. Complement C5 is the 5th component of complement, which plays a central role in inflammatory and cell killing processes.

Human Complement C5 produced in Human plasma having a molecular mass of 190 kDa.

### Product Info

**Amount :** 100 µg / 20 µg

**Purification :** Greater than 95.0% as determined by SDS-PAGE.

**Storage condition :** C5 Human is stable at 4°C if entire vial will be used within 2-4 weeks. Store, frozen below -20°C for longer periods of time. For long term storage it is recommended to add a carrier protein (0.1% HSA or BSA). Avoid multiple freeze-thaw cycles.
