

32-13781: MAOC Leishmania

Description

Source: Escherichia Coli.

Physical Appearance: Sterile Filtered clear solution.

Biological Activity: null

Recombinant Leishmania Donovanii Maoc Family Dehydratase-Like Protein produced in E. Coli is a single, non-glycosylated, polypeptide chain containing 157 amino acids having a molecular mass of 18 kDa. The Maoc Family Dehydratase-Like Protein is fused to a 6xHis tag at C-terminus and purified by proprietary chromatographic techniques.

Product Info

Amount : 0.25 mg / 50 µg

Purification : Protein is >95% pure as determined by 10% PAGE (Coomassie staining).

Storage condition : Maoc Family Dehydratase-Like Protein Recombinant although stable at 4°C for 1 week, should be stored below -18°C.
