30-2722: Anti-Hu PDPN (cancer type) Purified

Clone Name: Monoclonal
Clone Name: LpMab-23
Application: WB, FACS, IHC

Reactivity: Human
Gene: PDPN
Gene ID: 10630
Uniprot ID: Q86YL7
Format: Purified

Alternative Name: podoplanin podoplanin, AGGRUS, OTS8, T1A2, T1A1

Immunogen Information: recombinant human PDPN

Description

PDPN (podoplanin) is a type I transmembrane glycoprotein of mucin-type character. The specific function of this protein has not been determined, but its homologs in other species were described as differentiation antigens. PDPN can be used as a marker of lung injury. Alternatively spliced transcript variants encoding different isoforms have been identified.

Specificity: The mouse monoclonal antibody LpMab-23 recognizes an extracellular epitope on human cancer type PDPN, a transmembrane glycoprotein, serving as a prognostic marker of oral carcinoma. This antibody recognizes an altered glycosylation pattern that occurs on oral cancer cells and it shows minimal reactivity with the surrounding non-cancerous tissue.

Product Info

Amount: 0.1 mg

Purification : Purified by protein-A affinity chromatography.

Content: Concentration: 1 mg/ml

Storage Buffer: Phosphate buffered saline (PBS), pH 7.4, 15 mM sodium azide

Storage condition : Store at 2-8°C. Do not freeze.

Application Note

Flow cytometry: Recommended dilution: 1-5 Ã\\(\hat{A}\)\(\mu\)g/ml.
