

## 32-17696: Recombinant Human GPC3 Protein, hFc Tag

**Uniprot ID :** P51654

**Alternative Name :** DGSX; GTR2-2; MXR7; OCI-5; SDYS; SGB; SGBS; SGBS1

### Description

Molecular Characterization: hFc(Glu99-Ala330) GPC3(Asp511-Ser560)

Molecular weight: The protein has a predicted molecular mass of 43.3 kDa after removal of the signal peptide.

Description: Recombinant Human GPC3 Protein with N-terminal Human Fc tag

Cell surface heparan sulfate proteoglycans are composed of a membrane-associated protein core substituted with a variable number of heparan sulfate chains. Members of the glypican-related integral membrane proteoglycan family (GRIPS) contain a core protein anchored to the cytoplasmic membrane via a glycosyl phosphatidylinositol linkage. These proteins may play a role in the control of cell division and growth regulation. The protein encoded by this gene can bind to and inhibit the dipeptidyl peptidase activity of CD26, and it can induce apoptosis in certain cell types. Deletion mutations in this gene are associated with Simpson-Golabi-Behmel syndrome, also known as Simpson dysmorphia syndrome. Alternative splicing results in multiple transcript variants. ### Product Info

**Amount :** 100 µg / 50 µg

**Content :** Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilization.

**Storage condition :** Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing).  
Lyophilized proteins are shipped at ambient temperature.
