

32-18115: Recombinant Human POSTN Protein, His Tag**Uniprot ID :** Q15063**Alternative Name :** OSF-2; OSF2; PDLPOSTN; PN**Description**

Molecular Characterization: POSTN(Asn22-Gln836) 6xHis tag

Molecular weight: The protein has a predicted molecular mass of 91.8 kDa after removal of the signal peptide. The apparent molecular mass of POSTN-His is approximately 55-100 kDa due to glycosylation.

Description: Recombinant Human POSTN Protein with C-terminal 6xHis tag

This gene encodes a secreted extracellular matrix protein that functions in tissue development and regeneration, including wound healing, and ventricular remodeling following myocardial infarction. The encoded protein binds to integrins to support adhesion and migration of epithelial cells. This protein plays a role in cancer stem cell maintenance and metastasis. Mice lacking this gene exhibit cardiac valve disease, and skeletal and dental defects. Alternative splicing results in multiple transcript variants encoding different isoforms.

Product Info**Amount :** 100 µg / 50 µg**Content :** Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilization.**Storage condition :** Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
