

32-18408: Human FSTL3 Protein, hFc Tag

Uniprot ID : O95633
Alternative Name : FLRG; FSRP

Description

Description : Recombinant human FSTL3 Protein with C-terminal human Fc tag

Background : Follistatin-like 3 is a secreted glycoprotein of the follistatin-module-protein family. It may have a role in leukemogenesis.

Molecular Characterization: mass of 51.1 kDa after removal of the signal peptide. The apparent molecular mass of FSTL3-hFc is approximately 55-70 kDa due to glycosylation.

Tag : C-Human Fc tag

Product Info

Amount : 50 µg / 100 µg

Purification : The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue staining.

Content : Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilization.

Storage condition : Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
