

32-18413: Human CD300A Protein, hFc Tag

 Uniprot ID:
 Q9UGN4

 Alternative Name
 IRC1; IRC2; CLM-8; IRp60; IGSF12; CMRF35H; CMRF35H; CMRF35H; CMRF35H9; CMRF35-H9; IRC1/IRC2; CMRF-35-H9

Description

Description : Recombinant human CD300A Protein with C-terminal human Fc tag

Background : This gene encodes a member of the CD300 glycoprotein family of cell surface proteins found on leukocytes involved in immune response signaling pathways. This gene is located on chromosome 17 in a cluster with all but one of the other family members. Multiple transcript variants encoding different isoforms have been found for this gene. **Molecular Characterization:** mass of 43.8 kDa after removal of the signal peptide.

Tag :C-Human Fc tag

Product Info

Amount :	50 μg / 100 μg
Purification :	The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue staining.
Content :	Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilization.
Storage condition :	Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.
