## 32-18436: Human CLEC10A Protein, hFc Tag

Uniprot ID: Q8IUN9

Alternative Name: HML; MGL; HML2; CD301; CLECSF13; CLECSF14

## **Description**

**Description**: Recombinant human CLEC10A Protein with N-terminal human Fc tag

**Background :** This gene encodes a member of the C-type lectin/C-type lectin-like domain (CTL/CTLD) superfamily. Members of this family share a common protein fold and have diverse functions, such as cell adhesion, cell-cell signalling, glycoprotein turnover, and roles in inflammation and immune response. The encoded type 2 transmembrane protein may function as a cell surface antigen. Two transcript variants encoding distinct isoforms have been identified for this gene.

**Molecular Characterization:** mass of 54.9 kDa after removal of the signal peptide. The apparent molecular mass of hFc-CLEC10A is approximately 55-70 kDa due to glycosylation.

Tag: N-Human Fc tag

## **Product Info**

**Amount:** 50 μg / 100 μg

Purification: The purity of the protein is greater than 95% as determined by SDS-PAGE and Coomassie blue

staining.

Content: Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before

lyophilization.

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended

**Storage condition:** for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient temperature.
