

12-9551B: Biotinylated Anti-Dxd antibody(1A5); Rabbit mAb

Clonality :	Monoclonal
Clone Name :	1A5
Application :	ELISA
Gene :	Dxd
Uniprot ID :	N.A.
Alternative Name :	N.A.
Isotype :	IgG

Description

Dxd is a potent anti-cancer drug, acting as an alkaloid camptothecin analog and a DNA topoisomerase I inhibitor. It forms a stable complex with topoisomerase I and DNA, impeding DNA replication and inducing cancer cell death. Dxd is utilized as a payload in specific antibody-drug conjugates (ADCs), with examples such as trastuzumab deruxtecan targeting HER2 and patritumab deruxtecan targeting HER3.

Product Info

Amount :	10 µg / 100 µg
Purification :	Purified from cell culture supernatant by affinity chromatography
Content :	Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution.
Storage condition :	Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.

Application Note

ELISA 1:5000-10000

Figure 1. Elisa plates were pre-coated with IgG-Dxd (0.2µg/per well). Serial diluted Biotinylated anti-Dxd monoclonal antibody (12-9551B) solutions were added, washed, and incubated with secondary antibody before Elisa reading. From above data, the EC50 for Biotinylated anti-Dxd monoclonal antibody binding with IgG-Dxd is 6.1 ng/ml.
