12-9643: Anti-IGF1 antibody(3H1), IgG1 Chimeric mAb

Clonality: Monoclonal

Clone Name: 3H1
Application: ELISA
Reactivity: Human
Gene: IGF1
Uniprot ID: P05019

Alternative Name: IGF;MGF;IGFI;IGF-I

Isotype: Rabbit/Human Fc chimeric IgG1

Description

The protein encoded by this gene is similar to insulin in function and structure and is a member of a family of proteins involved in mediating growth and development. The encoded protein is processed from a precursor, bound by a specific receptor, and secreted. Defects in this gene are a cause of insulin-like growth factor I deficiency. Alternative splicing results in multiple transcript variants encoding different isoforms that may undergo similar processing to generate mature protein. [provided by RefSeq, Sep 2015]

Product Info

Amount : $10 \mu g / 100 \mu g$

Purification : Purified from cell culture supernatant by affinity chromatography

Content :Lyophilized from sterile PBS, pH 7.4. Normally 5 % – 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions of reconstitution.

before tyophilization. Flease see Certificate of Arialysis for specific instructions of reconstitution

Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended

Storage condition: for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing).

Lyophilized proteins are shipped at ambient temperature.

Application Note

ELISA 1/5000-10000

Figure 1. ELISA plate pre-coated by 1 μ g/ml (100 μ l/well) Human IGF1, hFc tagged protein can bind Rabbit anti-IGF1 monoclonal antibody(clone: 3H1) in a linear range of 10-100 ng/ml.
