## 12-8294: Anti-Zika, Env (Clone ZIKA-9670)-Purified No Carrier Protein

Clonality: Monoclonal
Clone Name: ZIKA-9670
Application: ELISA

**Alternative Name :** Envelope, E protein **Isotype :** Mouse  $lgG1 ext{ } \kappa$ 

## **Description**

Specificity: Anti-Zika virus (Clone ZIKA-9670) is specific for Zika virus envelope (E) protein.

Background: Zika virus (ZIKV) infection during pregnancy is a global public health problem 1, linked causally to severe fetal abnormalities 2. Prophylactic antibodies may prove useful in treating pregnant patients or for designing epitope-specific vaccines 1. ZIKV is a mosquito-transmitted flavivirus that encodes a single polyprotein with an ~11 kb positive-sense RNA open reading frame 1. The polyprotein is cleaved into seven non-structural (NS) proteins and three structural proteins (capsid (C), pre-membrane (prM), and envelope (E)). C forms a nucleocapsid. prM complexes with E to facilitate folding and prevent premature fusion to host membranes. E is responsible for viral assembly, attachment, entry, and fusion 1,3 and is a major target of neutralizing antibody research 3. Mature ZIKV virions incorporate 180 copies each of the E and M proteins 4,5.

## **Product Info**

Content:

Amount: 250µg

**Purification :** Preparation: This monoclonal antibody is purified by ion exchange chromatography.

Concentration: ≥1.0 mg/ml

Formulation: Formulated in 0.015 M phosphate buffered saline (0.85% NaCl), pH 7.2 and contains 0.05% sodium azide. Due to inherent biochemical properties of antibodies, certain

products may be prone to precipitation over time. Precipitation may be removed by aseptic

centrifugation and/or filtration.

**Storage condition :** This purified antibody is stable when stored at 2-8°C. Do not freeze.

## **Application Note**

ELISA, Lateral Flow
