

12-9224-PE: PE-conjugated Anti-AFP antibody(DMC281); IgG1 Chimeric mAb

Clonality :	Monoclonal
Clone Name :	DMC281
Application :	Flow Cyt
Reactivity :	Human
Conjugate :	PE-conjugated
Gene :	AFP
Uniprot ID :	P02771
Alternative Name :	AFPD; FETA; HPAFP
Isotype :	Rabbit/Human Fc chimeric IgG1

Description

This gene encodes alpha-fetoprotein; a major plasma protein produced by the yolk sac and the liver during fetal life. Alpha-fetoprotein expression in adults is often associated with hepatocarcinoma and with teratoma; and has prognostic value for managing advanced gastric cancer. However; hereditary persistence of alpha-fetoprotein may also be found in individuals with no obvious pathology. The protein is thought to be the fetal counterpart of serum albumin; and the alpha-fetoprotein and albumin genes are present in tandem in the same transcriptional orientation on chromosome 4. Alpha-fetoprotein is found in monomeric as well as dimeric and trimeric forms; and binds copper; nickel; fatty acids and bilirubin. The level of alpha-fetoprotein in amniotic fluid is used to measure renal loss of protein to screen for spina bifida and anencephaly.

Product Info

Amount :	100 Test
Purification :	Purified from cell culture supernatant by affinity chromatography
Content :	Liquid PBS with 0.05% Proclin300, 1% BSA
Storage condition :	Store at 2°C-8°C for 6 months

Application Note

Flow Cyt 1:100
