

12-9414-PE: PE-conjugated Anti-PMEL antibody(DMC420); IgG1 Chimeric mAb

Clonality :	Monoclonal
Clone Name :	DMC420
Application :	Flow Cyt
Reactivity :	Human
Conjugate :	PE-conjugated
Gene :	PMEL
Uniprot ID :	P40967
Alternative Name :	D12S53E; gp100; ME20; ME20-M; ME20M; P1; P100; PMEL17; SI; SIL; SILV
Isotype :	Rabbit/Human Fc chimeric IgG1

Description

This gene encodes a melanocyte-specific type I transmembrane glycoprotein. The encoded protein is enriched in melanosomes; which are the melanin-producing organelles in melanocytes; and plays an essential role in the structural organization of premelanosomes. This protein is involved in generating internal matrix fibers that define the transition from Stage I to Stage II melanosomes. This protein undergoes a complex pattern of posttranslational processing and modification that is essential to the proper functioning of the protein. A secreted form of this protein that is released by proteolytic ectodomain shedding may be used as a melanoma-specific serum marker. Alternate splicing results in multiple transcript variants.

Product Info

Amount :	100 Test
Purification :	Purified from cell culture supernatant by affinity chromatography
Content :	Liquid PBS with 0.05% Proclin300, 1% BSA
Storage condition :	Store at 2°C-8°C for 6 months

Application Note

Flow Cyt 1:100
