

12-90488: Anti-BTN3A3 antibody(3E7), Rabbit mAb

Clonality :	Monoclonal
Clone Name :	3E7
Reactivity :	Human
Conjugate :	Unconjugated
Gene :	BTN3A3
Uniprot ID :	O00478
Alternative Name :	BTF3
Isotype :	Rabbit mAb

Description

The butyrophilin (BTN) genes are a group of major histocompatibility complex (MHC)-associated genes that encode type I membrane proteins with 2 extracellular immunoglobulin (Ig) domains and an intracellular B30.2 (PRYSPRY) domain. Three subfamilies of human BTN genes are located in the MHC class I region: the single-copy BTN1A1 gene (MIM 601610) and the BTN2 (e.g., BTN2A1; MIM 613590) and BTN3 (e.g., BNT3A3) genes, which have undergone tandem duplication, resulting in 3 copies of each (summary by Smith et al., 2010 [PubMed 20208008]).[supplied by OMIM, Nov 2010]

Product Info

Amount :	100 µg / 10 µg
Purification :	Purified from cell culture supernatant by affinity chromatography
Content :	Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8% trehalose is added as protectants before lyophilization.
Storage condition :	Store at -20°C to -80°C for 12 months in lyophilized form. After reconstitution, if not intended for use within a month, aliquot and store at -80°C (Avoid repeated freezing and thawing). Lyophilized proteins are shipped at ambient temperature.

Application Note

Flow Cyt 1/100

Figure 1. Flow cytometry analysis with 1µg/mL Anti-BTN3A3 (3E7) mAb on HEK293 cells transfected with human BTN3A3 (Blue histogram) or HEK293 transfected with irrelevant protein (Red histogram).
