32-1572: rLeptin tA Recombinant Protein

Description

Source: Escherichia coli. Leptin Antagonist Triple Mutant Rat Recombinant is a singly non-glycosilated polypeptide chain containing 146 amino and additional Ala at N-terminus acids and having a molecular mass of ~ 16 kDa, Leptin was mutated, resulting in L39A/D40A/F41A mutant. Leptin Antagonist Triple Mutant Rat Recombinant was purified by proprietary chromatographic techniques.

Product Info

Amount: $50 \mu g$

Purification : Greater than 99.0% as determined by:(a) Gel filtration analysis.(b) Analysis by SDS-PAGE. **Content :** The protein was lyophilized from a concentrated (0.85mg/ml) solution with 0.003mM NaHCO3.

Lyophilized Leptin-Antagonist Triple Mutant Rat Recombinant although stable at room

temperature for several weeks, should be stored desiccated below -18 $^{\circ}$ C. Upon reconstitution at > 0.1 Leptin mutant mg/ml and up to 2 mM and filter sterilization LEP-tA mutant can be stored

Storage condition:

at 4°C or even room temperature for several weeks making it suitable for long term infusion studies using osmotic pumps. At lower concentration addition of a carrier protein (0.1% HSA or

BSA) is suggested. Please prevent freeze-thaw cycles.

Amino Acid: The sequence of the first five N-terminal amino acids was determined and was found to be Ala-

Val-Pro-Ile-Gln.

Application Note

It is recommended to reconstitute the lyophilized Leptin Antagonist Triple Mutant Rat Recombinant in sterile water or sterile 0.4% NaHCO3adjusted to pH 8-9, not less than $100\tilde{\mathbb{A}}$ \mathbb{A} \mathbb{A} \mathbb{A} which can then be further diluted with other aqueous solutions. The Leptin Antagonist Triple Mutant Rat Recombinant is capable of inhibiting leptin-induced proliferation of BAF/3 cells stably transfected with the long form of human leptin receptor. It also inhibits various leptin effects in several in vitro bioassays.
