## 32-1596: MIF Recombinant Protein

Alternative Name: Phenylpyruvate tautomerase, Glycosylation-inhibiting factor, GIF, MMIF, MIF.

## **Description**

Source: Escherichia Coli. Synonyms: Phenylpyruvate tautomerase, Glycosylation-inhibiting factor, GIF, MMIF, MIF. The cytokine Macrophage migration inhibitory factor (MIF) has been identified to be secreted by the pituitary gland and the monocyte/macrophage and to play an important role in endotoxic shock. MIF has the unique property of being released from macrophages and T cells in response to physiological concentrations of glucocorticoids. The secretion of MIF is tightly regulated and decreases at high, anti-inflammatory steroid concentration.
