36-1880: Monoclonal Antibody to CD8B (Cytotoxic / Suppressor T-Cell Marker)(Clone: BU88)

Clonality: Monoclonal Clone Name: BU88

Application: ELISA,FACS,IF

Reactivity: Human
Gene: CD8B
Gene ID: 926
Uniprot ID: P10966
Format: Purified
Alternative Name: CD8B,CD8B1
Isotype: Mouse IgG1, kappa
Immunogen Information: Human CD8 beta

Description

The T cell receptor (TCR) is a heterodimer composed of chains. CD3 chains and the CD4 or CD8 co-receptors are also required for efficient signal transduction through the TCR. The TCR is expressed on T helper and T cytotoxic cells that can be distinguished by their expression of CD4 and CD8. T helper cells express CD4 proteins and T cytotoxic cells display CD8. CD8 (also designated Leu 2 or T8), a cell surface glycoprotein, is a two chain complex receptor that binds class I MHC molecules presented by the antigen-presenting cell (APC). A primary function of CD8 is to facilitate antigen recognition by the TCR and to strengthen the avidity of the TCR-antigen interactions. An additional role for CD8-expressing T cells may be to maintain low levels of HIV expression.

Product Info

Amount : 100 μg

Purification: Affinity Chromatography

Content: 100 μg in 500 μl PBS containing 0.05% BSA and 0.05% sodium azide. Sodium azide is highly

toxic.

Storage condition : Store the antibody at 4°C; stable for 6 months. For long-term storage; store at -20°C. Avoid

repeated freeze and thaw cycles.

Application Note

ELISA (Use Ab at 2-4ug/ml for coating) (Order Ab without BSA); Flow Cytometry (1-2ug/million cells); Immunofluorescence (1-2ug/ml);
