10-1044: Monoclonal antibody to Bi-1 (Clone: ABM20E4)

Clonality: Monoclonal **Clone Name:** ABM20E4 Application: WB Reactivity: Human Gene: TMBIM6 Gene ID: 7009 **Uniprot ID:** P55061 Format: Purified

Alternative Name: TMBIM6,BI1,TEGT Isotype: Mouse IgG2a Kappa

Immunogen Information: A partial length recombinant protein of human Bi-1 (amino acids 1-200) was used as an

immunogen for this antibody.

Description

Bi-1 is an anti-apoptotic protein that inhibits Bax activation and its translocation to the mitochondria. Functionally, BI-1 affects the leakage of Ca2+ ions from the ER. In addition to its anti-apoptotic role, BI-1 also enhances cancer/tumor progression. It belongs to the BcI-2 family, plays an important role in the mitochondrial apoptosis pathway. Bi-1 over-expression suppresses apoptosis induced by Bax, staurosporine and growth factor deprivation. BI-1 is presumably not needed for the physiological regulation of developmental programmed cell death. The anti-apoptotic mechanism of BI-1 involves the suppression of Bax activation and translocation to mitochondria, preserving the mitochondria membrane potential and mitochondrial morphology, and preventing the activation of post-mitochondrial caspases. BI-1 function is also associated with the regulation of intracellular Ca2+ omeostasis. In several human cancers, including nasopharyngeal carcinoma, its expression was found to be increased; however, up-regulated expression of this protein has been linked to increased cell proliferations.

Product Info

Amount : $25 \mu g / 100 \mu g$

Purification: Protein G Chromatography

Content: 25 μg in 50 μl/100 μg in 200 μl PBS containing 0.05% BSA and 0.05% sodium azide. Sodium

azide is highly toxic.

Storage condition : Store the antibody at 4°C; stable for 6 months. For long-term storage; store at -20°C. Avoid

repeated freeze and thaw cycles.

Application Note

Western blot analysis: 4-6 µg/ml
