## 10-4172: Monoclonal antibody to B7-H4 (Clone: ABM53A6)

Clonality: Monoclonal Clone Name: ABM53A6 Application: IHC.FACS.WB Reactivity: Mouse, Human Conjugate: Unconjugated Gene: VTCN1

Gene ID: 79679 **Uniprot ID:** 07Z7D3 Format: Purified

V-set domain-containing T-cell activation inhibitor 1, B7 homolog 4, B7h.5, Immune **Alternative Name:** 

costimulatory protein B7-H4, Protein B7S1

Isotype: Mouse IgG2a, k

A partial length recombinant protein (a.a 23-220) of B7-H4 was used as the immunogen for **Immunogen Information:** 

this antibody.

## **Description**

B7-H4, a member of B7 family, is a transmembrane protein that has been shown to inhibit T cell responses and neutrophil expansion during bacterial infections. B7-H4 mRNA is widely distributed in mouse and human peripheral tissues and can be induced in monocytes, macrophages, and dendritic cells upon IL-6 and IL-10 stimulation. However, in a variety of tumor cells, B7-H4 is predominantly present in intracellular compartments with unknown mechanism and functions. Cell surface expression of B7-H4 protein is limited and shows an inducible pattern on hematopoietic cells. The overexpression of B7-H4 has been found in various types of human tumors, such as breast cancer, renal cell carcinoma (RCC), ovarian cancer, esophageal squamous cell carcinoma, gastric cancer, pancreatic cancer and melanoma etc, where its expression level is positively correlated with disease progression. By arresting cell cycle, B7-H4 ligation of T cells has a profound inhibitory effect on the growth, cytokine secretion, and development of cytotoxicity.

## **Product Info**

Amount:  $25 \mu g / 100 \mu g$ 

**Purification:** Protein G Chromatography

25 μg in 50 μl/100 μg in 200 μl PBS containing 0.05% BSA and 0.05% sodium azide. Sodium Content:

azide is highly toxic.

Store the antibody at 4°C; stable for 6 months. For long-term storage; store at -20°C. Avoid Storage condition:

repeated freeze and thaw cycles.

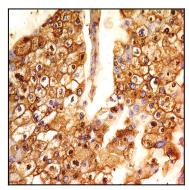

## **Application Note**

FACS: 0.5-1 μg/10<sup>6</sup> cells; Immunohistochemical analysis: 5 μg/ml; Western blot analysis: 2-4 μg/ml
