

10-3021-P: Monoclonal Antibody to TLR4 (Clone: HTA125) PE Conjugated

Clonality :	Monoclonal
Clone Name :	HTA125
Application :	FACS
Reactivity :	Human
Conjugate :	PE
Gene :	TLR4
Gene ID :	7099
Uniprot ID :	O00206
Format :	Purified
Alternative Name :	TLR4
Isotype :	Mouse IgG2a, kappa
Immunogen Information :	This antibody was developed by immunizing mice with Ba/F3 cell line expressing human TLR4 cell surface antigen.

Description

TLR4 (Toll-like receptor-4) is a member of the Toll-like receptor (TLR) family which plays a fundamental role in pathogen recognition and activation of innate immunity. It primarily mediates cellular signaling induced by Gram negative bacteria. TLR4 is highly specific for LPS and it is associated with CD14, a co-receptor for LPS. The downstream signaling pathway of TLR4 leads to the activation of NF-kappaB through myeloid differentiation protein (MyD88) and IL-1 receptor-associated kinase in various cell types. Keratinocytes express TLR4 at the mRNA and protein levels whereas TLR4 are also present in the normal human epidermis in vivo and their expression is regulated by microbial components. TLR4 is expressed on CD4+ T cells as well, the functional significance of which is unclear.

Product Info

Amount :	25 Test / 100 Test
Purification :	Protein G Chromatography
Content :	0.04 mg/ml in PBS with 0.05% Azide.
Storage condition :	Store the antibody at 4°C, stable for 6 months.

Application Note

FACS analysis: 1-2 µg/10⁶
