## 11-1020: Polyclonal Antibody to 14-3-3 sigma

Clonality: Polyclonal IHC,WB Application: Reactivity: Human SFN Gene: Gene ID: 2810 P31947 **Uniprot ID:** Format: Purified **Alternative Name:** SFN,HME1 Isotype: Rabbit IgG

Immunogen Information: Full length recombinant 14-3-3 sigma protein was used as the immunogen for this antibody.

## **Description**

14-3-3 sigma is a member of a highly conserved family of 14-3-3 proteins that are present in all eukaryotic organisms. There are 7 known human 14-3-3 isotypes and they play important roles in many biological activities by binding to and altering the subcellular localization and/or stability of key molecules in various signaling cascades. 14-3-3 sigma was originally characterized as a human mammary epithelium marker 1 and later rediscovered as an important molecule for cell cycle checkpoint regulation. Recently it has been reported that 14-3-3 sigma may serve as a prognosis marker predicting survival of pancreatic cancer patient treatment. 14-3-3 Sigma is the only 14-3-3 isoform induced by the tumor suppressor protein p53, in response to Gammairradiation and other DNA-damaging agents. 14-3-3 sigma is a p53-regulated inhibitor of G2/M progression and acts as a tumor suppressor gene that is inactivated by methylation of its 5' CpG islands in epithelial tumor cells. Two isoforms of the human proteins are produced by alternative splicing.

## **Product Info**

**Amount :** 25 μg / 100 μg

Purification: Protein A Chromatography

Content: 25 μg in 50 μl/100 μg in 200 μl PBS containing 0.05% BSA and 0.05% sodium azide. Sodium

azide is highly toxic.

Storage condition:

Storage condition:

Store the antibody at 4°C, stable for 6 months. For long-term storage, store at -20°C. Avoid

repeated freeze and thaw cycles.

## **Application Note**

Western blot analysis: 1-3 µg/ml, Immunohistochemical analysis: 10 µg/ml
