11-12007: Polyclonal Antibody to THEM2

Clonality: Polyclonal Application: WB Reactivity: Human ACOT13 Gene: Gene ID: 55856 Q9NPJ3 **Uniprot ID:**

Purified **Alternative Name:** ACOT13,THEM2,HT012,PNAS-27

Rabbit IgG Isotype:

Immunogen Information: Full length recombinant THEM2 protein was used as the immunogen for this antibody.

Description

Format:

THEM2 (Thioesterase Superfamily Member 2) belongs to the hotdog-fold enzyme superfamily but its biological function remains unknown. It comprises of a single hotdog fold thioesterase domain. Under biological conditions, THEM2 probably functions as a homotetrameric long-chain acyl-CoA thioesterase. Accordingly, it has been designated as the 13th member of the mammalian acyl-CoA thioesterase family, Acot13. THEM2 occurrence is most predominant in the kidney and is regulated by the hepatocyte nuclear factor 4alpha which in turn might play an important role in renal cell carcinoma.

Product Info

Amount: 25 μg / 100 μg

Purification: Protein A Chromatography

25 μg in 50 μl/100 μg in 200 μl PBS containing 0.05% BSA and 0.05% sodium azide. Sodium Content:

azide is highly toxic.

Store the antibody at 4°C; stable for 6 months. For long-term storage; store at -20°C. Avoid Storage condition:

repeated freeze and thaw cycles.

Application Note

Western blot analysis: 2-4 µg/ml

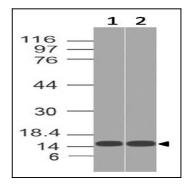

Fig-1: Expression analysis of THEM2. Anti-THEM2 antibody (11-12007) was used at 2 µg/ml on (1) Panc-1 and (2) h Brain lysate.
